

COVID-19 Vaccine Update #3: (*January 29, 2021*)

Thank you for following our COVID-19 Vaccine Updates. The following are developments since our last posted update on January 22nd:

FRRH Vaccine Clinic Details To-Date:

- Dr. Jessica Partlow, FRRH Family Physician has begun providing virtual COVID-19 patient consultation appointments to answer personalized patient questions specific to COVID-19 vaccines. Some patients have expressed concern or specific questions related to their medical history. Dr. Partlow has 15-minute virtual appointments available to FRRH patients by calling **834-3971** and requesting a vaccine consultation (choice of video telehealth or telephone available).
- COVID-19 Vaccine Dose 1 & Dose 2 allocations are pre-established by the State for each vaccine site. Based on this system, both vaccine doses need to be administered at the same site. FRRH will receive both doses for each patient choosing to vaccinate at FRRH. Please plan to present at the same site for both vaccine doses.
- On January 28th, Maine CDC announced that Maine's Federally Qualified Health Centers, including Fish River Rural Health, will receive COVID-19 vaccines for patients in the coming few weeks
- Although FRRH does not have an exact vaccine shipment date yet, please be assured that we will contact FRRH patients of record directly by telephone in accordance to Maine State guidelines as soon as we receive vaccine shipment confirmation.

Maine CDC published a new COVID-19 dashboard. Please follow this link to track COVID-19 vaccination progress in Maine: <https://www.maine.gov/covid19/vaccines/dashboard>

- **Further updates to follow as COVID-19 vaccine details develop**
